TRANSMITTAL LETTER

Dear Sir:

Transmitted herewith in the above-referenced patent are: (1) Request for Correction of Errors in Patent; (2) three pages of Form PTO/SB/44; (3) Statement of Antonia Nikitenko Under 37 C.F.R. § 1.324(b)(1); (4) separate Statements of Silvio Iera, Christopher A. Demerson, Jacqueline F. Lunetta, Michael F. MacEwan, Wayne G. McMahon, Arthur G. Mohan, Maria Papamichelakis and John R. Potoski Under 37 C.F.R. § 1.324(b)(2); (5) Statement of Consent of Sole Assignee Under 37 C.F.R. § 1.324(b)(3); and (6) three Declarations for Utility Patent Application. The Commissioner is authorized to charge processing fees per 37 C.F.R. §§ 1.20(a) & 1.20(b) of \$230.00 and any surcharge to Deposit Account No. 01-1425. A duplicate copy of this transmittal letter is enclosed for billing purposes.

Respectfully submitted,
WYETH

Request for Correction of Errors in Patent

Dear Sir:

Pursuant to 37 C.F.R. §§ 1.322-1.324, Patentees respectfully request correction of errors appearing in the above-referenced patent. To simplify matters, the separate grounds in support of each correction have been consolidated and presented in this single request. The processing fees required by 37 C.F.R. §§ 1.323 & 1.324(b)(4) are being paid by charge to a deposit account authorized in the Transmittal Letter filed herewith. For the benefit of the Office staff, the text of the requested corrections is submitted on three pages of Form PTO/SB/44 attached hereto.

1. Petition To Correct Inventorship Under 37 C.F.R. § 1.324(a)

Pursuant to 37 C.F.R. § 1.324(a), Patentees respectfully request correction of the inventorship in the patent to add Antonia Nikitenko who had been inadvertently omitted from Application No. 10/066,356 and the declarations of record. It is asked that the Certificate of Correction be granted to name all of the actual inventors (see page 1 of the attached Form PTO/SB/44). For consistency, the order of the inventors has been changed to correspond to the order of the signatures on the supplemental Declarations for Utility Patent Application submitted herewith.

It recently came to light that the application that issued as U.S. Patent No. 6,806,366 on October 19, 2004 did not identify the correct inventive entity. The error was discovered as a consequence of an upcoming corporate Patent Award Dinner held in December of 2004 to honor the research scientists who had received a U.S. patent in their names during the past year at the

Pearl River, New York research facility of Wyeth. One of the original named inventors in the application, Dr. John Potoski, asked Dr. Antonia Nikitenko if she planned on attending the dinner, presuming that she knew about it, but Dr. Nikitenko had not received an invitation. She learned from her further discussion with Dr. Potoski that U.S. Patent No. 6,806,366 had issued; and he had thought that she was listed on the patent as a patentee with him. They had worked together in a collaborative effort with the other original named inventors to invent the subject matter that was claimed in the granted patent.

Dr. Antonia Nikitenko promptly notified the Patent Law Department at Wyeth of her omission from the issued patent and, following some initial meetings, the matter was sent to the undersigned attorney for an examination of the facts and determination of inventorship. After a thorough review of the claimed subject matter in both the issued patent and the allowed divisional Application No. 10/946,842 in view of all relevant notebooks and several telephone conferences, it was determined that Dr. Antonia Nikitenko should have been included in the earlier application and the division as an inventor. Furthermore, she had been unaware of the filing of the applications and the omission of her name from the inventive entity. It was clear that the error arose without any deceptive intention on the part of the person who through accidental error was not named as an inventor in the issued patent.

During the examination of the record to confirm inventorship, it became obvious that there might have been possible reasons to explain the error and show that it was an innocent mistake. The listing of the eight original joint inventors on the earlier Record of Invention had been submitted by one of the co-inventors, Dr. Christopher Demerson, from the research facility in St. Laurent, Canada. It appears that he had not been aware of the extent of the participation or contribution of each of the co-inventors working together in the research facility in Pearl River, New York; and, thus, unintentionally failed to include Dr. Nikitenko.

Moreover, the three declarations that had been executed by the original named inventors in the application issuing as U.S. Patent No. 6,806,366 had not listed the entire inventive entity on each document. It is confusing to see on close inspection of the record that all three declarations identified three different "first" inventors as Arthur G. Mohan, Silvio Iera and Michael F. McEwan. It is highly likely that this confusion may have contributed to the error in the inventive entity as originally filed, *i.e.*, none of the original named inventors would notice the inadvertent

omission of the name of the ninth joint inventor Antonia Nikitenko in an executed declaration in the nonprovisional application. Dr. Mohan had signed a declaration by himself on a line that read "sole or first inventor" and did not identify any of the other joint inventors. Similarly, when three of the nine inventors signed their declaration in Pearl River, they would not have seen the entire inventive entity on their declaration and would have no indication of who might have been accidentally omitted as a joint inventor from their application. To complicate matters, each person in Pearl River signed the declaration on a different day. Because they did not sign the document at the same time and not all inventors were listed, they would have no reason to suspect that Dr. Nikitenko might not be asked to sign the declaration on a different day or to sign a different declaration altogether like Dr. Mohan had done.

Most importantly, since the evidence supports the fact that Dr. Nikitenko made significant contributions to the claimed invention in the patent, the correction to name Dr. Nikitenko as one of the actual inventors is necessary. In support of the request to correct inventorship of the patent, this request is accompanied by the following documentation and fee payment: Statement of Antonia Nikitenko Under 37 C.F.R. § 1.324(b)(1) that establishes that the error in inventorship occurred without deceptive intention on her part; three Declarations for Utility Patent Application that properly identify the entire inventive entity and have been executed by the actual inventors as required by 37 C.F.R. § 1.63; eight Statements Under 37 C.F.R. § 1.324(b)(2) by all of the current named inventors, specifically, Silvio Iera, Christopher A. Demerson, Jacqueline F. Lunetta, Michael F. MacEwan, Wayne G. McMahon, Arthur G. Mohan, Maria Papamichelakis and John R. Potoski, agreeing to the change of inventorship with no disagreement in regard to the requested change; Statement of Consent of Sole Assignee Under 37 C.F.R. § 1.324(b)(3) providing the written consent of the sole assignee to add Antonia Nikitenko to the inventive entity of the patent; and payment of the processing fee required by 37 C.F.R. § 1.324(b)(4) in the Transmittal Letter.

Apart from the current submission, it is mentioned that an assignment executed by Antonia Nikitenko on August 3, 2005 to transfer her entire right, title and interest in the patent to Wyeth (the sole assignee) had been sent to the U.S. Patent and Trademark Office on August 10, 2005 to be recorded in the Assignment records.

It is further noted for the record that the Request To Correct Inventorship Under 37 C.F.R. § 1.48(a) that was quickly filed together with timely payment of the issue and publication

fees in the allowed divisional Application No. 10/946,842 to name Antonia Nikitenko has already been granted on September 2, 2005.

In view of the foregoing facts and the supporting documents demonstrating that through error, an inventor Antonia Nikitenko is not named in the issued patent and such error arose without any deceptive intention on her part, it is respectfully asked that the inventorship in the patent be corrected, Antonia Nikitenko be named as a joint inventor and the Certificate of Correction be granted to name all of the actual inventors in this patent.

2. Request To Correct Minor Errors Under 37 C.F.R. § 1.323

Pursuant to 37 C.F.R. § 1.323, Patentees respectfully request correction of minor errors occurring in Columns 6-8 in the patent and the issuance of the Certificate of Correction of applicants' mistake (see pages 1 and 2 of the attached Form PTO/SB/44). Payment of the appropriate fee set forth in 37 C.F.R. § 1.20(a) is being handled in the Transmittal Letter.

A cursory review of the situation will quickly show the Office that the Certificate of Correction is warranted to correct the minor errors appearing in the patent. It will also become clear that the mistakes for which the correction is sought are of a clerical nature or a typographical error; and the nature of the proposed correction does not involve changes which would constitute new matter or require reexamination. Since the mistakes do not affect claim scope and the requested correction thereof would not materially affect the scope or meaning of the patent, there is no reason to refuse the Certificate of Correction of applicants' mistake.

During the review process to determine the proper inventorship entity of the patent, certain errors came to light. The patented invention provides significant improvements over the procedure described in U.S. Patent No. 5,852,015 and summarized in Scheme I of U.S. Patent No. 6,806,366 (spanning the bottom of Columns 1 to 2). Notably, the starting material is in the *meta*-position, as also shown in Scheme II by Compound 1, *m*-nitrobenzenesulfonyl chloride (Column 3, below line 37). Scheme III (spanning Columns 5-8), however, incorrectly portrays that the substitution of the intermediate Compound 6 by sulfonamide is in the *ortho*-position, plus Compound 6 is missing two nitrogens and Compound 5 is missing the oxygen component of "NaO-," with the structural errors that are inconsistent with the full general Scheme I passing through to the structure in Columns 7 and 8. Merely looking at the starting material and the

reactants of Scheme III in light of Scheme I from U.S. Patent No. 5,852,015, one of ordinary skill in the art would readily appreciate that these mistakes in the structures of Scheme III are obvious typographical or clerical drafting errors. Nevertheless, because the inconsistency between Schemes I and III may give rise to future confusion, Patentees respectfully ask that the Certificate of Correction be granted to correct the structures of Scheme III in the patent.

3. Request To Correct Printing Errors Under 37 C.F.R. § 1.322(a)(1)

Pursuant to 37 C.F.R. § 1.322(a)(1), Patentees respectfully request the issuance of the Certificate of Correction to correct two mistakes in the claims of the patent that were incurred through the fault of the Office. The text of the requested corrections is set forth on page 3 of the attached Form PTO/SB/44.

Specifically, Claim 2 erroneously states in the patent that the upper limit of the temperature is "about 250° C." However, Claim 2 had recited the temperature of *about 25°C*, as originally filed in the U.S. Patent and Trademark Office on January 31, 2002 on page 14, line 27 of the application and subsequently listed in the Amendment of May 10, 2004 without change. It is obvious that "about 250° C." is a printing error.

Claim 13 in the patent inaccurately states: "followed by additional of additional acetonitrile...." The phrase should have read: *followed by addition of additional acetonitrile* per the language of the corresponding Claim 17 originally filed in the Office on January 31, 2002 on page 17, line 3 of the patent application. Original Claim 17 was revised merely to remove "such as" in the Amendment of February 2, 2004 and then listed in the Amendment of May 10, 2004 without further change, but the phrase *followed by addition of additional acetonitrile* was never altered. It is evident that "followed by additional of additional acetonitrile" is a printing error.

Due to the mistakes in Claims 2 and 13 being clearly disclosed in the records of the Office, Patentees respectfully request that the Certificate of Correction be granted to correct the printing errors in the patent.

In sum, Patentees respectfully request that all of the foregoing errors in the patent be corrected through the issuance of the Certificate of Correction. Favorable treatment is urged.

Thank you for your attention to this matter.

Respectfully submitted,

WYETH

SEP 29 2005

fees in the allowed divisional Application No. 10/946,842 to name Antonia Nikitenko has already been granted on September 2, 2005.

In view of the foregoing facts and the supporting documents demonstrating that through error, an inventor Antonia Nikitenko is not named in the issued patent and such error arose without any deceptive intention on her part, it is respectfully asked that the inventorship in the patent be corrected, Antonia Nikitenko be named as a joint inventor and the Certificate of Correction be granted to name all of the actual inventors in this patent.

2. Request To Correct Minor Errors Under 37 C.F.R. § 1.323

Pursuant to 37 C.F.R. § 1.323, Patentees respectfully request correction of minor errors occurring in Columns 6-8 in the patent and the issuance of the Certificate of Correction of applicants' mistake (see pages 1 and 2 of the attached Form PTO/SB/44). Payment of the appropriate fee set forth in 37 C.F.R. § 1.20(a) is being handled in the Transmittal Letter.

A cursory review of the situation will quickly show the Office that the Certificate of Correction is warranted to correct the minor errors appearing in the patent. It will also become clear that the mistakes for which the correction is sought are of a clerical nature or a typographical error; and the nature of the proposed correction does not involve changes which would constitute new matter or require reexamination. Since the mistakes do not affect claim scope and the requested correction thereof would not materially affect the scope or meaning of the patent, there is no reason to refuse the Certificate of Correction of applicants' mistake.

During the review process to determine the proper inventorship entity of the patent, certain errors came to light. The patented invention provides significant improvements over the procedure described in U.S. Patent No. 5,852,015 and summarized in Scheme I of U.S. Patent No. 6,806,366 (spanning the bottom of Columns 1 to 2). Notably, the starting material is in the *meta*-position, as also shown in Scheme II by Compound 1, *m*-nitrobenzenesulfonyl chloride (Column 3, below line 37). Scheme III (spanning Columns 5-8), however, incorrectly portrays that the substitution of the intermediate Compound 6 by sulfonamide is in the *ortho*-position, plus Compound 6 is missing two nitrogens and Compound 5 is missing the oxygen component of "NaO-," with the structural errors that are inconsistent with the full general Scheme I passing through to the structure in Columns 7 and 8. Merely looking at the starting material and the

reactants of Scheme III in light of Scheme I from U.S. Patent No. 5,852,015, one of ordinary skill in the art would readily appreciate that these mistakes in the structures of Scheme III are obvious typographical or clerical drafting errors. Nevertheless, because the inconsistency between Schemes I and III may give rise to future confusion, Patentees respectfully ask that the Certificate of Correction be granted to correct the structures of Scheme III in the patent.

3. Request To Correct Printing Errors Under 37 C.F.R. § 1.322(a)(1)

Pursuant to 37 C.F.R. § 1.322(a)(1), Patentees respectfully request the issuance of the Certificate of Correction to correct two mistakes in the claims of the patent that were incurred through the fault of the Office. The text of the requested corrections is set forth on page 3 of the attached Form PTO/SB/44.

Specifically, Claim 2 erroneously states in the patent that the upper limit of the temperature is "about 250° C." However, Claim 2 had recited the temperature of *about 25°C*, as originally filed in the U.S. Patent and Trademark Office on January 31, 2002 on page 14, line 27 of the application and subsequently listed in the Amendment of May 10, 2004 without change. It is obvious that "about 250° C." is a printing error.

Claim 13 in the patent inaccurately states: "followed by additional of additional acetonitrile...." The phrase should have read: *followed by addition of additional acetonitrile* per the language of the corresponding Claim 17 originally filed in the Office on January 31, 2002 on page 17, line 3 of the patent application. Original Claim 17 was revised merely to remove "such as" in the Amendment of February 2, 2004 and then listed in the Amendment of May 10, 2004 without further change, but the phrase *followed by addition of additional acetonitrile* was never altered. It is evident that "followed by additional of additional acetonitrile" is a printing error.

Due to the mistakes in Claims 2 and 13 being clearly disclosed in the records of the Office, Patentees respectfully request that the Certificate of Correction be granted to correct the printing errors in the patent.
